ROADMAP: PAVING THE PATH TO SUCCESS

Our project roadmap is set out in four phases, starting with a fair presale to raise the necessary funds for marketing and cloud mining operations and ending with the fully developed \$TTIKCOIN platform.

PHASE 1: Presale and Token distribution

Presale

- Industry research and consultation
- Token, presale and staking contract development
- BT campaign presale launch, claim and exchange listings
- Extensive multimedia marketing campaign launch

Phase 2: Early Staking Incentive

In this phase, the early supporters and buyers of Ttikcoin from the presale will be offered a unique opportunity. They will have the chance to stake their tokens directly into the smart contract even before the official listing day. This strategic move is designed to provide them with a high early Annual Percentage Yield (APY) advantage, setting the tone for the token's staking ecosystem.

Phase 3: Presale Token Claiming

To ensure an equitable launch, presale buyers of Ttikcoin will be granted the ability to claim their tokens simultaneously with the Uniswap listing. This simultaneous release will foster trust and maintain the integrity of the project, ensuring that all participants have an equal footing in the token's distribution.

Phase 4: DEX Launch on Uniswap

The highly anticipated moment arrives as Ttikcoin makes its debut on Uniswap, the world's largest decentralized exchange. This strategic choice of platform guarantees a seamless trading experience for users, offering them the best possible environment to buy, sell, and interact with TTIKCOIN. The early liquidity provided by Uniswap listing will serve as a solid foundation for the token's market presence.

Looking Ahead: A Future of Innovation and Impact

As Ttikcoin progresses through its roadmap, it remains committed to the principles of fairness, innovation, and community engagement. The journey ahead holds the promise of further enhancing the token's utility, amplifying its reach, and contributing positively to the crypto landscape.
